Fight Focused Concepts

...after all it's a fight!

Situations dictate strategies, strategies dictate tactics, and tactics dictate techniques.

Fight Focused Concepts mission is to teach and ingrain fluid self defense concepts from entry level to advanced levels.

To teach our students the skill sets that will not only cover their "most likely" situation, but also covers a very large portion of the possible fight that may show up at their door.

To teach our students to be the very best that they can be inside of the correct context of the fight.

www.fightfocusedconcepts.com

Fight Focused Concepts is a firearms training company that puts the focus back on common sense, combat proven, and reality based self defense. Our goal is to provide the very best information, instruction, and skill sets that we can find to help solve the complex problems of the situational based use of lethal force. The reality of a fight is that the situation is the dictating factor. Situations dictate strategies, strategies dictate tactics, and tactics dictate techniques, techniques should not dictate anything.

Fight Focused Concepts is a concept driven approach to self defense. This allows you to be more versatile and more "well rounded" than technique focused training. This versatility will allow you to easily cover a much larger portion of the "fight continuum." Many of the technique focused institutes curriculum are based on competition. We base our curriculum on the fight.

FIGHT FOCUSED

C O N C E P T S

Fight Focused Concepts teaches you to be the very best that you can be, inside of the correct context of the fight. We take a very personal look at your situation and help you personalize a fighting system that is built around who you are. We explore your abilities, limitations, strengths, and weaknesses. We then find out exactly what you need to do, to be the very best that you can be inside of the correct context of the fight.

Fight Focused Concepts understands how busy our lives can be. We know perfectly well the financial limitations that many of us have to deal with. We specialize in teaching natural, instinctive, reflexive, and intuitive fluid concepts that take a shorter time to learn while having long lasting retention qualities. When it comes to training to fight for your life or the life of your loved one, you need to know that what you are learning can be learned quickly, can stay with you for a long time, and works well under the physiological effects of a life threatening confrontation.

This price will include picking you up & dropping you off at the airport, driving you to your hotel room, to the range and lunch.

PRIVATE IN-HOME OR BUSINESS PERSONAL PROTECTION CONSULTATIONS

Do you have a plan? Have you thought it through? Have you taken everything into consideration? Have you tested it? Will it hold up under the chaos of a life threatening attack?

Fight Focused Concepts is proud to offer a very forward thinking training opportunity to their clientele. You can bring Roger into your home or your business to evaluate your personal protection philosophy and strategy. We will give you suggestions, strategies, tactics, and skill sets to improve your home/business security and personal protection plan.

“Everybody’s got a plan until they get punched in the mouth.” Mike Tyson

That is the reality of a plan. If your plan has not been tested under pressure there is no reality to that plan. We will take a look at your very personal situation, listen to the plan of action that you have in place, then test that plan under reasonable pressure. We will find the strengths and the weaknesses inside of your plan and make the necessary adjustments to increase your odds of coming out of the encounter victoriously. We will analyze and test the specific situation until we have come to a consensus on the best solution to the specific problem we are focusing on. We will teach you the strategies, the tactics, and the skill sets to implement the revised plan to its optimum level.

We have found that the most commonly taught solutions are not always the best solutions. There is a lot of misconception on the way that things go down inside of a lethal encounter, especially inside of the home. The stakes are very high when we talk about a life threatening confrontation. When our life and the lives of our loved ones or employees are on the line, it is not just about winning. It is about winning while doing everything possible to insure the safety and protection of those under our care.
